OTHER HELPFUL DETAILS

The Daily Racing Form: "The Form," as it is called, is the Wall Street Journal of the racing world. Just as the WSJ deals with stock information, The Form provides valuable and detailed analysis of at least ten past performance running lines on each of the horses in each race. The Form also provides editorial copy, selections and opinion.

The Track Announcer: Calls the action during each race and provides continuous updates of racing information such as late scratches, overweights & jockey changes throughout the day.

HOW TO READ THE INFIELD TOTE BOARD

Located in the infield behind the finish line, the Tote Board provides constantly updated current odds, amounts in wagering pools, jockey and weight changes, fractional times for each race, results and payoffs, and messages.

Don't miss the Kentucky Derby on May 7th!!	RACE NO.	5	TOTAL	ODDS	1 9/5
	MINUTES TO POST	10	18625	WIN	5265
	POST TIME	3:00	5598	PLACE	2739
	TIME OF DAY	2:50	3026	SHOW	1059
Message board	Starting time of next race	Total money wagered to win, place & show on all horses in the race	Money wagered on individual horse to win, place & show		

WHAT THE ODDS MEAN

The odds do not represent each horse's chances of winning, but what bettors think those chances are, based on how they actually bet. Odds are based on the WIN pool only. The lower the odds on the tote board, the better the chances of that horse winning the race, in the estimation of the betting public. The odds are set by the amount of money the public bets on each horse.

Boxing Horses

Calculating how much your bet will cost when you box a bet, you get all the combinations of the horses you selected.

\$1 Quinella Box

Total number of horses you want to box times the total number of horses you want to box minus 1, divided by 2.
Example: A \$1 Quinella Box involving 4 horses.
 $4 \times (4-1) = \$12, \$12 \div 2 = \$6$

\$1 Exacta Box

Total number of horses you want to box times the total number of horses you want to box minus 1
Example: A \$1 Exacta Box involving 4 horses.
 $4 \times (4-1) = \$12$

.50¢ Trifecta Box

Total number of horses you want to box times the total number of horses you want to box minus 1, times the total number of horses you want to box minus 2, divided by 2.
Example: A .50¢ Trifecta Box involving 4 horses.
 $4 \times (4-1) \times (4-2) = \$24, \$24 \div 2 = \12

.10¢ Superfecta Box

Total number of horses you want to box times the total number of horses you want to box minus 1, times the total number of horses you want to box minus 2, times the total number of horses you want to box minus 3, times .10¢
Example: A .10¢ Superfecta Box involving 4 horses.
 $4 \times (4-1) \times (4-2) \times (4-3) = \$24, \$24 \times .10¢ = \2.40

2 **Wager Amount, Type of Bet & Program Number**
Example: \$2 to win on Number 6
OR \$5 exacta, 2-7

Correct Examples:

Turf Paradise, Race 5, \$2 to win on Number 6 **OR** Santa Anita, Race 2, \$5 exacta, 2-7
